

Please do not allow our passengers to have the liberty to ignore us even more because they are on the phone. We need their complete attention when it comes to safety issues...soon there will be no restrictions on ANYTHING so what you will have is a plane full of people who do not want anyone to tell them what to do...even though it is for their safety. The cell phone is already a problem with alot of our passengers. Please do not give them more leverage to disrespect our jobs. Soon the FAA will not need flight attendants because there will be no rules for the passengers to adhere to so what do you need flight attendants for????
